1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 1-47 are objected to because of the following informalities: the individual claim numbers of all current claims are listed as "[c1]" ... "[c47]". Current USPTO practice reserves the "[" and "]" brackets as indicators for that which is to be removed from the claims. All the current claim numbers should be rewritten as - - Claim 1 - - ... - - Claim 47 - -. Appropriate correction is required.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-7, 12-25, 27-30, 33-36, 38-41, 43, 45-47 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-7, 11-24, 26-29, 32-35, 38-40, 42, 44-46 respectively of copending Application No. 10/708,830 in view of Walker 2003/0093187A1. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: claims of the current application and copending application contain identical elements except that the current application recites a "smellprint" detector and the copending application recites a "DNA" detector. Walker discloses a card or tag that can detect odors [0715]. It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the odor detector of Walker in the biometric card of the copending '830 application claims. This would allow the card to further detect possible explosives or toxic substances [0715].

5. Claims 8-11,26,31-32,37,42,44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention the specific smell sensor details as recited in the objected to claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vatanen US 2002/0083320A1, Ross US 2001/0013546A1, Buescher et al 6,588,660, Geefield WO 9606409A1 all disclose biometric cards.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.
